

CRAFTING BRAND GUIDELINES

WHO WE ARE

When developing Main Street Auto's identity, my goal was to craft a brand voice that felt personal, trustworthy, and deeply rooted in community. The brand needed to balance a professional, multi-location network with the character of a local shop that customers know by name.

VOICE

Main Street Auto's tone of voice is friendly, trustworthy, and approachable while maintaining the professionalism of a multi-location network. Crafted to feel personal and easy to understand, breaking down intimidating auto repair talk into something welcoming and clear.

WE'VE GOT YOUR BACK.

We stand by our work.
Leave us a review.

COLOR PALETTE

The color palette was designed to embody Main Street Auto's approachable yet confident identity. Strong, energetic reds paired with clean neutrals create visual impact, while supporting tones add depth and flexibility across various applications.

TYPOGRAPHY

Typography plays a crucial role in expressing the brand's bold and accessible personality. The type system was built to be clear and readable in high-traffic environments, while maintaining a strong, recognizable presence across print and digital media.
