

PHOTOGRAPHY GUIDELINES

I identified photography as a major gap in the automotive space—an industry often reliant on generic stock imagery. My goal was to showcase the real people behind the work, capturing authentic moments in our shops to bring the brand's story to life.

Every photo used in the brand's materials is ours — ensuring that people and places always feel genuine and true to their community. I learned how to use a professional camera within my first few weeks at Main Street Auto and was constantly on the road after that to visit our shops, I've captured 99% of the photos and videos you see.
